ABOUT ME

Software Engineering graduate with internship experience in web development using Laravel and Python. Experienced in building cross-platform applications and backend systems, seeking to grow within a collaborative development team.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, PHP, HTML/CSS, SQL, C++
Frameworks & Libraries: React, Django, .NET MAUI, Laravel, Bootstrap
Mobile Development: .NET MAUI 9, XAML, Cross-platform development
Databases: Firebase Realtime Database, SQLite, MySQL, SQL Server
Tools & Platforms: Git, GitHub, Visual Studio Code, Visual Studio, Unity
Concepts: Object-Oriented Programming, MVC Architecture, MVVM Pattern, Database Design, Async/Await Programming, CRUD Operations, Cloud Database Integration, Software Requirements Engineering, Django ORM

WORK EXPERIENCE

Software Development Intern

Smart Link

Jul 2024 – Sep 2024

Riyadh, Saudi Arabia

- Assisted in Kayako Ticketing System development using Laravel (PHP) and MySQL as part of a collaborative development team
- Implemented ticket management features including classification, prioritization, and user permission controls
- Worked with Laravel framework and MVC architecture to build scalable backend modules for ticket tracking and workflow automation

PROJECTS

StudyBuddy - Mobile Study Tracker | .NET MAUI 9, C#, Firebase, XAML

[GitHub](#) | [Download](#)

- Developed cross-platform mobile application using .NET MAUI 9 enabling students to track study sessions with real-time timer functionality and cloud data persistence
- Implemented Firebase Realtime Database integration with complete CRUD operations for goal management across Android, iOS, macOS, and Windows platforms
- Built real-time stopwatch feature with async threading, cancellation tokens, and 100ms UI refresh rate for accurate time tracking
- Applied async/await programming patterns for non-blocking database operations and responsive user interface

Uniten Peer Rating Platform (Final Year Project) | Django, Python, SQLite, Bootstrap

[GitHub](#)

- Developed a Django-based peer rating platform with role-based access control for students, organizers, and admins
- Implemented comprehensive event management system supporting creation, organizer assignment, participant registration with capacity limits, and automatic status tracking
- Built gamification features including a points system, 6-level progression, and achievement badges across 3 categories
- Designed normalized database schema using Django ORM with 8+ interconnected models managing users, events, ratings, badges, and point history

EDUCATION

Universiti Tenaga Nasional

Bachelor of Computer Science (Software Engineering) (Hons.)

Putrajaya, Malaysia

Graduated: September 2025

- Relevant Coursework: Software Engineering, Database Systems, Web Development, Mobile Application Development, Object-Oriented Programming, Data Structures & Algorithms, Computer Networks, Operating Systems, Software Requirements Engineering
